

Migration to UNIVERGE® SV8100

Expand Your System While Protecting Your Investment

You want to protect your investment in NEC's Electra Elite® 192, IPK or IPK II system, but you also want to take advantage of the latest software and applications to give you a competitive advantage and increase revenue. With NEC's new migration path to the UNIVERGE SV8100 Communications Server, you don't have to choose.

With NEC's migration strategy to the UNIVERGE SV8100 Communications Server, you get enhanced features and increased capacity without a forklift of your existing key system and digital terminals – which means you save time and money. Even your current phones' capabilities are upgraded. This simple solution effectively extends your current system's life and ensures that your initial investment in NEC pays off for years to come.

At a Glance

- Simple migration
- Investment protection
- More features and improved functionality
- Enhanced Unified Communications (UC) choices
- Assured future system support

Simple Migration

Migration from an Electra Elite 192, IPK or IPK II system to the SV8100 is as simple as inserting a conversion card into the old system and connecting it to the SV8100 with a cable. That's all it takes. The features and benefits of the SV8100 are ready to use.

Investment Protection

Your investment in our communications solutions is important to us – no matter when you made it. Migrating to the SV8100 protects your initial investment by providing a simple, economic way to keep your system while adding more up-to-date features that help you become more agile, compete on a larger scale and improve customer satisfaction. As a result, it lowers costs and provides a superb return on investment.

More Features and Improved Functionality

NEC's latest UNIVERGE solutions can help your business become more productive and collaborative. When you migrate to the SV8100, you gain access to a wealth of features that were not available on the Electra Elite 192, IPK or IPK II. The SV8100 adds IP capability and expands your system's capacity to more than 500 station ports. You can add many of our latest telephones to your system and access even more features, like weather reports and photos that display right on your terminal screen.

Enhanced UC Choices

The SV8100 lets you choose the level of unified communications enhancement that is right for your business. If you require a complete, full-featured unified communications solution, UC for Business offers an extensive array of options such as presence, voicemail and/or unified messaging, a conference bridge, and contact center and console options plus more.

If your growing business needs a simpler option with basic, reliable UC features, UNIVERGE SV8100 Desktop Suite should meet your needs. It offers the latest presence, softphone and file sharing technologies in an easy to implement package.

Assured Future System Support

Migration to the SV8100 ensures that your NEC communications solutions will be supported in the future. When you migrate to the SV8100, you need not be concerned with end of life or end of support issues for the Electra Elite 192, IPK or IPK II. The life of your older system is lengthened because migration extends our support.

Specifications

Supported Terminals

Series	Name	Terminal Type	Associated System
